

# Release notes

## 1.5.7 [17 August 2015]

- Upgrade Ruby version

## 1.5.6 [6 August 2015]

- Show tasks that were assigned to different agents on their dashboard
- Improve the styling of the sign in forms
- Speed improvements for showing agenda items
- Speed improvements for Document Vault

## 1.5.5 [8 July 2015]

- Speed up management of folders by an admin
- Add metrics gathering for better insights into the speed of the platform

## 1.5.4 [8 June 2015]

- Update "about time3" pdf
- Show dates of next & previous month in datepicker
- Render correct dates for todos within lifeplanning instead of dates for goals
- Add missing footer where it wasn't shown before in admin
- Fix issue where filenames that were longer than 255 characters were not allowed. We now no longer have a limit on the file path length other than the filesystems limit

## 1.5.3 [21 May 2015]

- Fix wrong sequence of document versions
- Speed up document vault when uploading

## 1.5.2 [15 May 2015]

- No longer create multiple document versions when uploading a new document
- Clean up specs
- No longer show a 404 after a user attempts to download a shared document which has already been downloaded
- Redirect to desired pages after creating & updating tasks, todos and reports in order to optimize the workflow in the admin
- Show a more interesting life planning widget on dashboard. Widget now includes faces of family members & short description
- Dockerize the application for faster & easier CI-testing using Buildkite

## 1.5.1 [13 April 2015]

- Added linkable release notes. The version number now links to a document explaining the changes in each release
- Updated the About pdf with new information

## 1.5.0 [31 March 2015]

- Sort subtasks by completed & date
- Improve filtering of tasks in admin
- Remove transparency from uploaded PDF's to Document Vault
- Do not show the flash message notifying you need to log in when visiting
- Add icons to replace "edit", "create", and "destroy" links

## 1.4.3 [19 March 2015]

- Fix font sizes discrepancy between tasks and lifeplanning
- Add Kifid logo to footer
- Fix footers
- Add stock photo to login pages
- Add "About Time3" pdf

## 1.4.2 [19 March 2015]

- Fix bug where administrators would see tasks that belonged to accounts from their colleague administrators instead of only their own

## 1.4.1 [19 March 2015]

- No longer show completed task that are past due on the dashboard

## 1.4.0 [9 March 2015]

- Correctly sort contacts according to specifications
- Only allow Life Planning Report grades between 0 and 10
- Allow administrators to view archived tasks
- Speed up editing a category in the document vault
- Show overdue tasks on the admin dashboard
- Fix order of active clients on dashboard
- Add back button to Media Box for easier back navigation out of an album
- Add version number to back-end

## 1.3.4 [6 March 2015]

- Temporarily disable pagination to work around a bug while we implement a new search

## 1.3.3 [4 March 2015]

- Improve speed of the Document Vault

## 1.3.2 [20 Februari 2015]

- Change the order of tags
- Fix assigning documents to task issue where documents would be added even though you unselected them

## 1.3.1 [13 Februari 2015]

- Fix/disappearing documents

## 1.3.0 [9 Februari 2015]

- Speed up document vault by using remote uploads and processing PDF's in the background
- Cache document parent selection

## 1.2.1 [15 Januari 2015]

- Prevent breaking name of administrator in dropdown on user filter

## 1.2.0 [15 Januari 2015]

- Allow removal of previously selected dates
- Speed up the document vault by caching the tree in various places

## 1.1.4 [9 Januari 2015]

- Allow selection of dates 100 years in the future (used to be 20)

## 1.1.3 [16 December 2014]

- Fix copy (Multiple of Hobby in Dutch is "Hobby's")

## 1.1.2 [8 December 2014]

- Do not allow categories that contain document versions to be deleted

## 1.1.1 [2 December 2014]

- Automatically redirect to the Document Vault with the correct folder opened after updating or creating a document
- Fix document search to also search based in name in database
- Use the category popup to select a category for a document

## 1.1.0 [26 November 2014]

- Automatically expand the category selected from the breadcrumbs
- Change copy of account number
- Use the same date picker everywhere in the admin
- Admin document search also searched on account & contact names now
- Show all family members on the dashboard even if they don't have a picture
- Allow archiving categories that previously contained documents
- Do not show archived categories in popups anymore

## 1.0.9 [19 November 2014]

- Fix recreating of low quality version PDF's

## 1.0.8 [17 November 2014]

- Fix the display of the document date
- Fix downloading of previous document versions
- Improve the quality of previews generated from PDFs
